MePa

COLLECTION

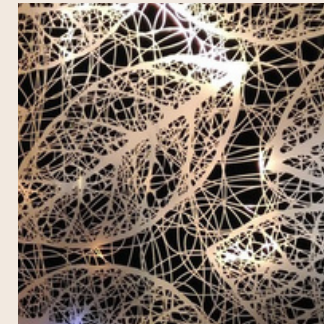

Fine engraved stainless steel screens, cut with complete freedom.

MADE IN ITALY

The MePa Collection

MePas (Metal Panels) are fine stainless steel screens available in standard modules or custom sizes. Caino Design combines the art of processing steel with artistic research, drawing on Italy's centuries-old talent for elegance, quality and attention to detail.

The charm lies in the subtle play between shadows, reflections, details and dimensions.

Finely processed yet extremely thin and hard — complete freedom to realize detailed, delicate designs.

Infinite possibilities of interaction between finishes: shiny, satin, engraved or half-etched.

A pattern language, cut in steel.

BOTANICAL

Lace-fine florals, leaves and ginkgo fronds, engraved with the density of hand embroidery.

GEOMETRIC

Hexagons, stars and faceted lattices — precise, architectural, endlessly repeatable.

ORGANIC

Veined leaves, coral-like webs and cellular textures that filter light unevenly.

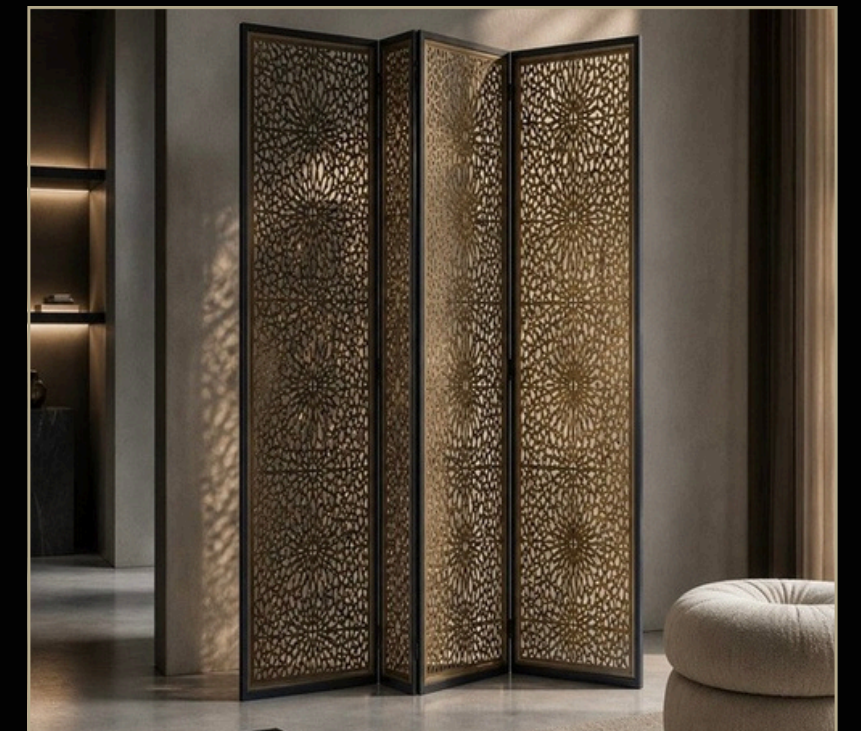

SUSPENDED SYSTEMS

Space dividers, cast in light steel.

Screen dividers hang from a steel cable system fastened to the ceiling, joined into vast seamless walls, or simply left to sway. Suspended MePas turn a room divide into an object of quiet spectacle.

Curtains, walls and cladding.

MePas offer infinite possibilities of light and shadow.
Engraved panels installed on facades make the surroundings
shine, while curved panels can bring sinuous elegance to
every environment.

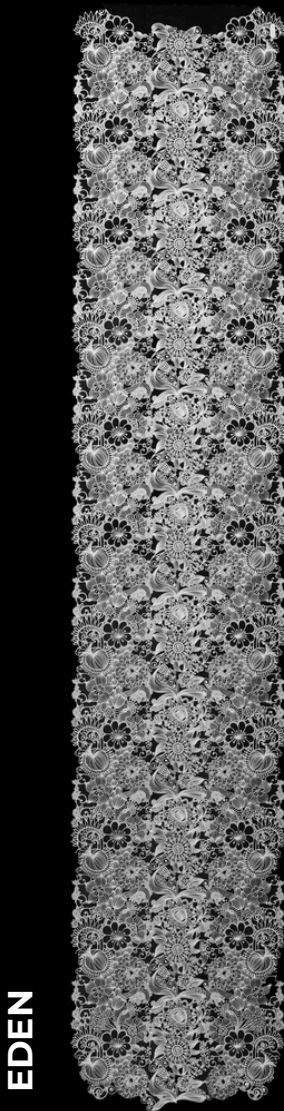

TECHNICAL SPECIFICATIONS

Highlights + Datasheets

The MePa Collection is a range of stainless steel panels only 0.3 mm thick.

-  Made in recyclable material
-  Long life
-  Packed rolled up in cardboard cylinders
-  Cost-effective shipping
-  Quick and easy installation

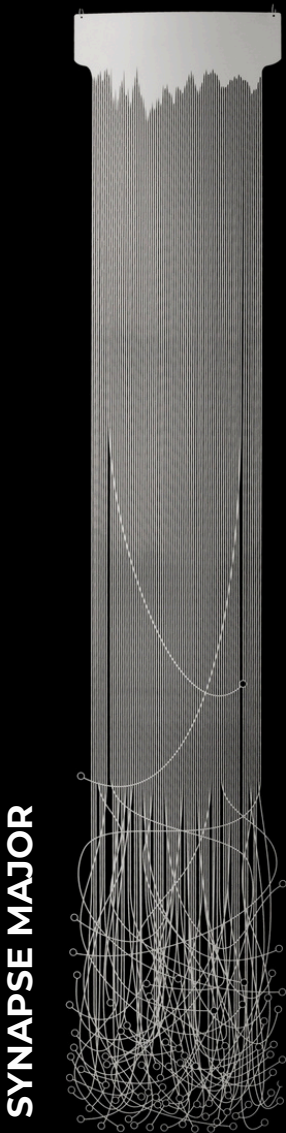

480 mm

2470 mm

Material: Stainless Steel
Thickness: 0.3 mm
Weight: < 0,9 Kg
Surface Finish: On request
Packaging: Cardboard cylinder
Design: Takorabo
