POP

COLLECTION

Ultra-thin engraved stainless steel panels, folded by hand.

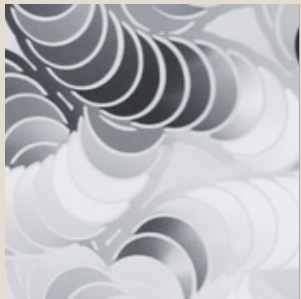

Design by A + N

MADE IN ITALY

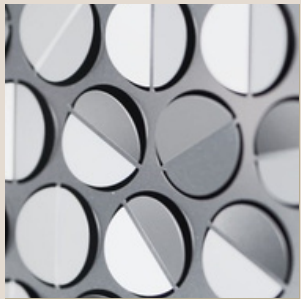

The POP Collection

Born in 2021 from a transnational collaboration between A+N and Caino Design, the POP Collection emerged through participation in the Worth Partnership Project, an exploration of what super-thin engraved steel becomes in someone else’s hands.

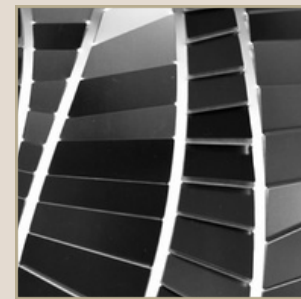

What if we apply a way of material manipulation to super-thin engraved steel sheets?

What new characteristics can steel panels bring to the spaces we live in?

What unexpected aesthetic effects can make the mind wander?

What do you see beyond the pattern?

Four motifs, one material language.

KNOT

Interlaced curls that fall like fabric, catching light along every ridge.

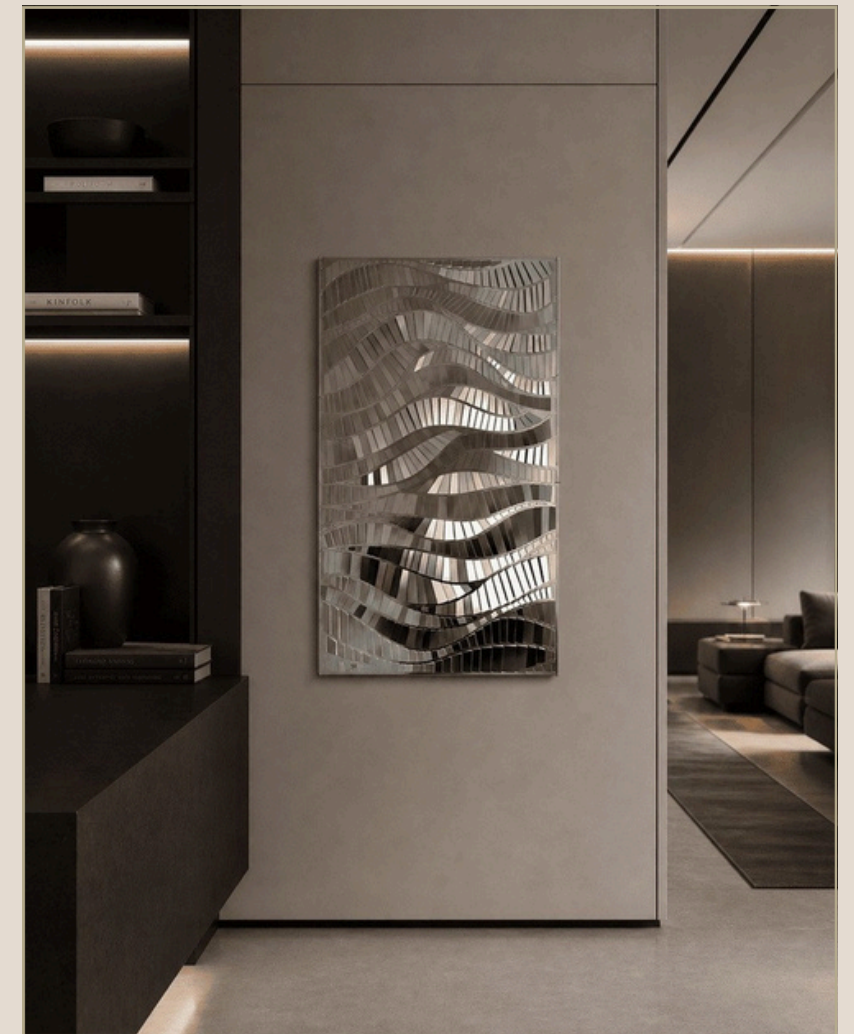

COINS

Side by side discs in a quiet metallic rhythm, precise and bright.

NEW WAVE

Layered circular forms that swell outward like a slow-moving tide.

PLEATS

A fluid arrangement of shapes that expand and contract.

KNOT

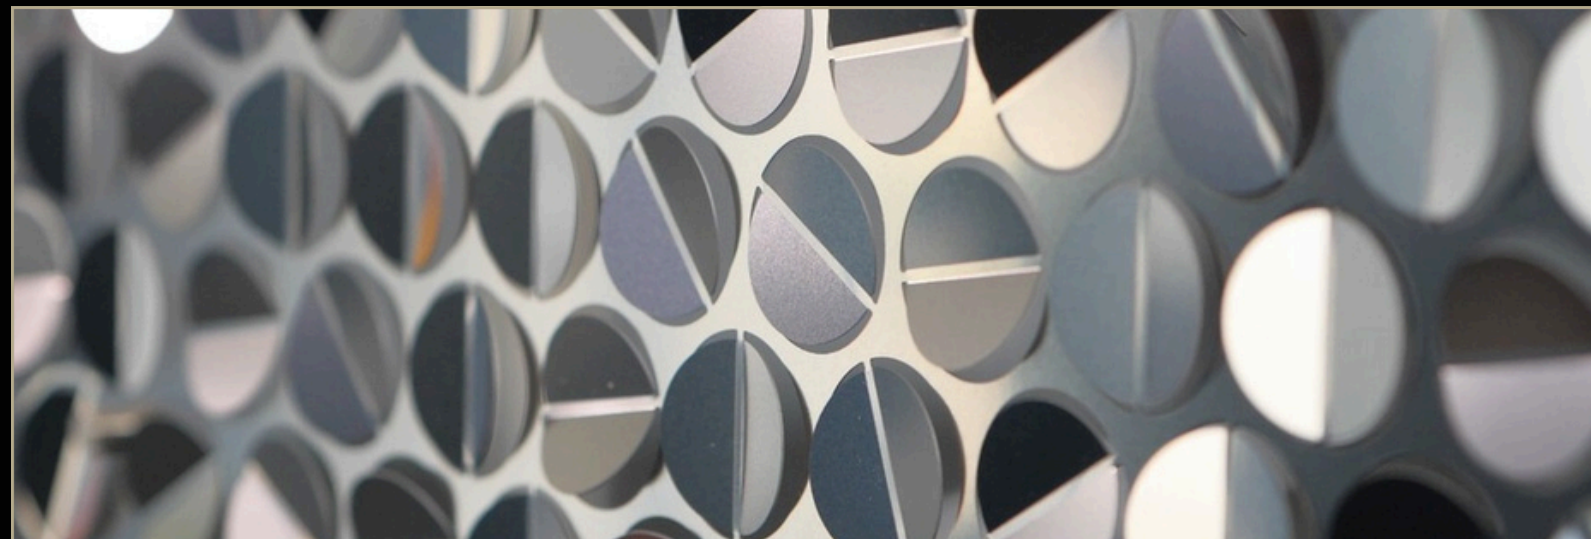

A wall becomes a moving surface.

Steel discs are pierced and coaxed into spirals of coiling ribbon, hung to fall the full height of a room. Each curl catches the light differently as you pass the same panel, ever-changing.

COINS

Overlapping discs, half-etched and half-mirrored, are set edge to edge to form a shifting checkerboard of light. Applied to columns, panels or partitions, Coins reads differently with every step the viewer takes.

NEW WAVE

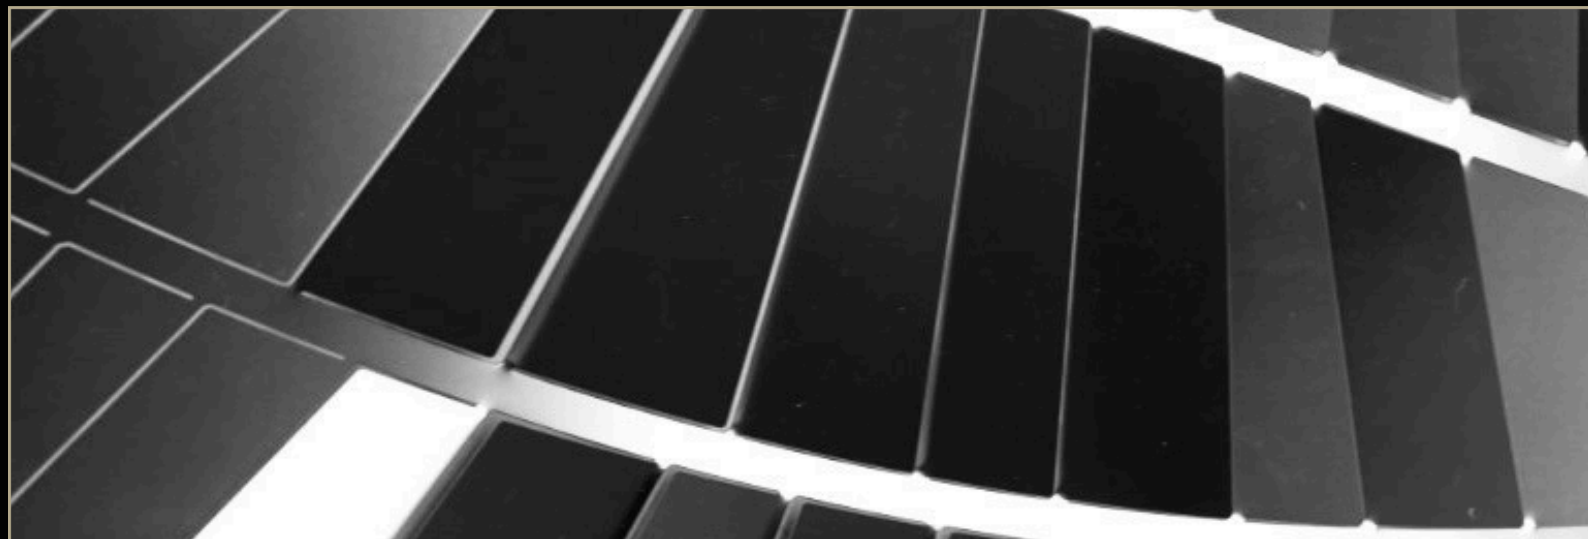

A wall becomes a moving surface.

Hundreds of layered circles build outward from a single point, forming a dense, cloud-like volume that softens any doorway or corner it occupies. Suspended or wall-mounted, New Wave brings quiet movement to still rooms.

PLEATS

The surface shifts between reflection and shadow, creating a dynamic architectural skin that evolves with perspective and movement

TECHNICAL SPECIFICATIONS

Highlights + Datasheets

The POP Collection is a range of polished stainless steel panels only 0.3 mm thick, foldable by hand to achieve their finished form.

-  Made in recyclable material
-  Long life
-  Packed rolled up in cardboard cylinders
-  Cost-effective shipping
-  Quick and easy installation

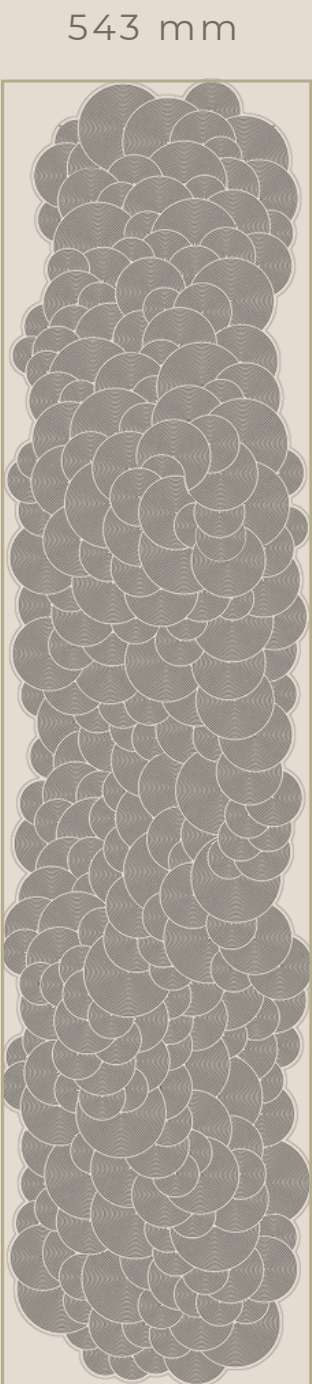

Material: Stainless Steel
Thickness: 0.3 mm
Weight: < 1 Kg
Surface Finish: Gloss
Packaging: Cardboard cylinder
Design: Alissa + Nienke

Material: Stainless Steel
Thickness: 0.3 mm
Weight: < 2,2 Kg
Surface Finish: Gloss
Packaging: Cardboard cylinder
Design: Alissa + Nienke

Material: Stainless Steel
Thickness: 0.3 mm
Weight: < 3 Kg
Surface Finish: Gloss
Packaging: Cardboard cylinder
Design: Alissa + Nienke

Material: Stainless Steel
Thickness: 0.3 mm
Weight: < 2,1 Kg
Surface Finish: Gloss
Packaging: Cardboard cylinder
Design: Alissa + Nienke

Designed to elevate the art of living.

The POP Collection is more than a surface. It is a material study, craftsmanship, engineering and imagination folded into every panel.
